IUFRO WORLD SERIES VOL. 2. FOREST DECIMAL CLASSIFICATION. TRILINGUAL SHORT VERSION:
ENGLISH, GERMAN, FRENCH.

R. Schnker (*)

M. Zorn (*)

D. Voshmgir (*)

M. J. Lionnet (*)

This updated manual, formerly the Oxford System of Decimal Classification of Forestry, is not only an aid for forest libraries and documentation centers, for publishers of periodicals, vocabularies and bibliographies, but also helps foresters, forest scientists, and students to keep their personal records in good order.

One of the most important features of this system is its hierarchical structure that is based on an easily memorized framework. The appendices have been updated too, including the UDC form and geographical numbers in English, German and French. 140 pages. Price: USS45.
